

THE LIGHT POLE IS
EVOLVING.

**Every design depicts
excellence -**

Find your Architect
needs before hand.

Pier is no mortal pole. What sets it apart is that it's completely customizable. After many years of advanced custom machinery development, today the Pier is made in a state-of-the-art, fully customized, and only one in the world specialty pole production machinery.

Ever wanted to
have your own
custom designed
light pole?

LEDFIXTS is pioneering the concept that poles have just as much of a place in urban and architectural design as trees and artwork. Poles can make a statement that attracts attention and positively contributes to the experience of an urban setting.

PIER IS A SMART LIGHT POLE FOR THE GENERATION ENAMORED WITH DESIGN, DISTINCTIVENESS, TECHNOLOGY, AND CONNECTIVITY.

Designers & Architects - Rejoice!

Pier is no mortal pole. What sets it apart is that it's completely customizable. After many years of advanced custom machinery development, today the Pier is made in state-of-the-art, fully customized, and only one in the world specialty pole production machinery.

Take full control when designing your light pole. First, choose the shape (round or square), the diameter, and the overall length. Then, start personalizing your pole with your desired patterns which can be executed via CNC or laser cutting directly onto the pole's body. Finally, choose the finish which can be anywhere from anodized finishes to any RAL color imaginable.

MILLIONS OF DESIGN POSSIBILITIES.

The Pier is only limited by your imagination.

Height and Diameter Options

Height and Diameter Options (Height as low as 30in to 40ft and diameter as thin as 4" to 8").

Base Shape Options

(Circle and Square)

Laser Cut

Custom Cut-Out Design & Logo applications. Anything that you can design or come up with.

Multitude of Finish Options

RAL Powdercoat, Anodize, Brushed.

Add ons

Impact resistant custom polycarbonate lens extensions or inserts with UV inhibitors are added features that are available for poles higher than 7ft.

The cut out design

Laser cut designs are completely customizable according to the application as well as your taste. This includes any type of pattern or B&W silhouette.

The finish

You can choose a raw aluminum, polished or sandblasted finish. A full range of anodized finishes can be specified, from a light champagne to a Colombian coffee bronze.

MORE PERSONAL. MORE DYNAMIC. MORE THAN JUST A LIGHT POLE.

Light poles filled with the latest technology.

With tons of tech and interactive features available, Pier will add a great functional design element to any environment.

ADD THE FEATURES YOU WANT.
